

NEWSLETTER MAY 2020

THE GLOW MUST GO ON!!

Flawless Aesthetics by Sonia, would like to first thank all our customers for their patience and to wish everyone good health during these challenging times. As evident from our PM's speech on the 11th of May, the beauty industry may not be able to re-open at full speed until early July.

For our clients who normally take pride in maintaining a healthy skin and looking their best, Flawless has created an Online video consultation facility, via WhatsApp, Instagram and Zoom, so that despite the lockdown, you can ask questions, have a skin assessment, plan your skin care and register to order your AlumierMD products.

We have also partnered with AlumierMD, to deliver your skin care products direct to your door step within 2-4 days. So looking after your skin in the comfort of your home has never been easier!!

Follow & contact us via Instagram <https://www.instagram.com/flawlessaestheticsbysb/?hl=en>
Text or call us on [07590064446](tel:07590064446) to book your online free session and get your AlumierMD login code.

BRIGHTENING BOOSTER
Brighten and even skin tone with AlumierMD's Brightening Booster. The skin is exfoliated with a lotus seed facial scrub and then a fruit enzyme mask. Retinol, specialised peptides and plant extracts target different pigment mechanisms to boost results and brighten the complexion.

Hyperpigmentation: This imaging system shows improvement of hyperpigmentation after the treatment regime (left in comparison to before (right)).

SKIN SOOTHE
AlumierMD's Skin Soothe is a gentle hydrating and soothing treatment. A moisture mask with hyaluronic acid, vitamin B5 and shea butter plumps and hydrates the skin by drawing in moisture. For oily skin, opt for a lightweight, oil-free hydrating mask to infuse hydration. Finish with soothing ingredients like lincolicid and shea butter.

Redness: This imaging system shows improvement to reduce after the 6 treated regime (left in comparison to before (right)). Skin may exhibit dryness and yellow pigmentation, cleared away.

TREAT YOUR SKIN THIS SUMMER

When the cold weather goes and the sun comes out, everyone likes to spend more time outside. To help maintain the skin care results you have achieved during the cooler months, AlumierMD has created a selection of highly efficacious treatments perfect for the warmer months.

Following your skin care regimen during the summer months requires periods of sun avoidance. Remember to avoid sun and heat for 48 hours after professional treatments and to use a broad spectrum sunscreen of at least SPF 30.
